

# Carbon Monoxide a Clear and Present Danger

This program addresses the hazards inherent in carbon monoxide generation and testing procedures. Additionally, it provides an overview of combustion analysis and the relation of building pressures to carbon monoxide generation.

## Training Manual

Item: COPM

ISBN: 1-930044-20-8

Copyright: 2003 | Retail: \$44.95

This 168 page training manual is broken into three sections:

Section 1 - Carbon Monoxide (CO) Explains; what CO is, how CO is produced, health effects of CO exposure, how to respond to an alarm, basic testing procedures, code compliance and exposure standards.

Section 2 - Combustion: An in depth explanation of combustion analysis, troubleshooting and remediation of CO production for both gas and oil fired appliances such as; boilers, furnaces, hot water heaters, clothes dryers, etc.

Section 3 - Pressure Measurements: A primer on how building pressures effect the distribution of carbon monoxide.

The spiral binding will allow students to tear out worksheets for grading by the instructor.

## Certification

To aid those in demonstrating their knowledge of the materials there are Employment Ready and Professional Level certifications available. These 50 question exams cover: alarms and response, building pressure measurements, building pressure general knowledge, combustion gas, combustion general knowledge, general knowledge, measurements, medial and tools.

\$25.00 Test Fee (Employment Ready)
